

Dermatologist Medical Group of North County

Medical, Surgical, and Cosmetic Dermatology

For over four decades, Dermatologist Medical Group (DMG) has earned its reputation as a premier medical and cosmetic dermatology practice. The team at DMG delivers the most up-to-date dermatology treatments including, skin cancer care, acne treatment, cosmetic procedures, and everything in between.

Among other accolades, they've been recognized as Top Doctors by the San Diego County Medical Society and San Diego Magazine for the past 16 years.

"All of our physicians truly enjoy what we do," says Dr. Alice Liu. "We will go the extra mile for our patients, even if it's on our own time. Many of us have been with DMG for many years, and some have spent their entire career with DMG, because we love it here—and I think it shows."

Their three locations in San Diego County—Oceanside, Encinitas, and a newly opened facility in Carmel Valley—are conveniently located and staffed with more than a dozen exceptional practitioners educated and trained in the latest treatments and technology.

DMG specializes in the full spectrum of medical, surgical, and cosmetic dermatology, including Mohs micrographic surgery and Xoft brachytherapy, which are considered the most effective treatments for common types of skin cancer. Patients are often prescribed new medications as soon as they become available, and all offices are outfitted with the newest equipment. DMG offers light and laser therapy and cosmetic treatments, including Botox, fillers, intense pulsed light, laser hair removal, microneedling, and peels.

"What truly drives our passion is the patient—caring for each one as an individual, listening to each person's concerns, helping in their skin treatment, and having a personal connection," says Dr. Liu. "I consider it a privilege and responsibility each time a patient entrusts me with their care." ■
